

## IOS - Apple iPhone and iPad

Go to > Settings > Wi-Fi > switch WiFi on > Choose a Network > select 'Las Casitas'  
Once connected, the login page should automatically appear. If it doesn't, open your browser (Safari) and attempt to open any website and the login page should appear there.

## Android - Samsung and other tablets/smart phones

select the Settings icon > choose Wireless & networks. > select Wi-Fi settings. If Wi-Fi is not already turned on, tap the check mark by Wi-Fi to turn it on. When Wi-Fi is enabled, available networks will appear below. Select 'Las Casitas'.

Once connected, the login page should automatically appear. If it doesn't, open your browser and attempt to open any website and the login page should appear.

## Windows

select wireless icon, bottom right of window > Choose 'Las Casitas' > Open Internet Explorer and attempt to open a website. Login page should appear.

## Mac

select wireless icon, top right of window > Check 'turn Wifi on' > select 'Las Casitas'. Login window should appear. If not, open Safari and attempt to open a webpage. Login page should appear.

## Notes

1. Internet speeds vary throughout the site depending on location of nearest Hot Spot antenna, and number of users logged in.
2. Max expected speed 2.5mbits per sec
3. Note that the bar Wifi (Devolo) unsecured. No password required
4. Wireless internet inside villas unreliable due to concrete/metal construction of walls
5. Please close wifi connection when finished to allow other users maximum internet speed
